

# US Petrolon Industrial

## USPI Large Engine Filtration System

- Removes moisture (up to 5 qts per element)
- Removes solid particles 1-3 $\mu$  and above (up to 12-14 lbs per element)
- Protects and preserves oil additive package
- Reduces operating temperature
- Significantly extends compressor and fluid life

## Stationary Filtration<sup>for</sup> Large Engines

Your engines support critical transportation and electrical infrastructure. They must perform continually with minimal downtime for maintenance, but engines continually ingest contaminants from the air (hard particles and moisture). Protect your engine with ultra-fine filtration by installing the USPI 1000H/C inline low pressure filtration system.

**DIMENSIONS:** 12"W x 36"H x 12"D  
**WEIGHT:** ~35lbs

### USPI AFA Series Filter Element

- Removes solid particles 1-3 microns and larger
- Holds up to 12-14 lbs of solids per element
- Holds up to 5 qts of water per element
